

# Last Run Presidents' Conference Committee (PCC) Cars 1954 - 2001 End Of An Era

Newark City Subway

## Newark City Subway

### Presidents' Conference Committee (PCC) Car Retirement-August 24, 2001

The Newark City Subway was built in the 1930s on the drained bed of the Morris Canal. Since 1954, PCC cars have operated on the 4.3 miles of track that make up today's Subway line. The PCC cars, built by the St. Louis Car Company between 1946 and 1949, are being replaced by NJ TRANSIT's new light rail vehicles.
